

Journalist and editor with five years of experience turning fast-moving technical and financial developments into clear, high-performing coverage. I've published 850+ stories that have reached millions of pageviews, built original short-form AI video accounts to tens of millions of views, and wrote and edited breaking news stories, newsletters, web show scripts, and social media content.

EXPERIENCE

Weekend Editor, The Block

Sep 2023 - Present

- File 6 to 8 news stories per weekend on market updates, regulatory developments, hacks and exploits, and protocol announcements for an industry-leading trade publication.
- Published 850+ stories reaching millions of pageviews; as of August 2026, ranked first in the newsroom in year-to-date total pageviews and average pageviews per article.
- Edit *The Funding*, a VC-focused newsletter, providing thorough feedback on structure, clarity, and accuracy.
- Incorporate primary sources, technical postmortems, regulatory filings, and more into clear, concise, and illuminating coverage for crypto investors, traders, and policy audiences.

Head Writer, Coinage (Trustless Media)

Jul 2022 - Sep 2023

- Wrote scripts and a newsletter for a weekly web show, distilling technical news and shaping timely narratives for a broad audience.
- Identified and interviewed the 19-year-old hacker who stole and returned \$200 million, earning a SABEW honorable mention for investigative work on a sensitive, fast-moving story.
- Co-reported a feature on Do Kwon and the Terra collapse that won a SABEW Best in Business award (2022).

Earlier Roles

2017 - 2022

- Data Editor, The Business of Business (2022); Data Reporter, Stacker (2021-22, intern 2018-19); Publisher & Managing Editor, Bwog at Columbia (2017-21).
- Reported on technology and business with end-to-end ownership from ideation through analysis and data visualization; helped lead an independent student publication to 70,000+ monthly pageviews and independent profitability.

INDEPENDENT WORK

AI Video Practice, @allhailthealgo

2023 - Present

- Built a short-form video presence to tens of millions of views leveraging developments in open-source AI tooling.
- Design production workflows with open-source AI tools and consult for various firms on AI pipelines; presented on creative AI work at Akash Accelerate and the ComfyUI NYC meetup.
